Objectives In Employment

To find a rewarding and inspiring full-time position in professional web design.

To leave a legacy of creative design solutions that make a lasting impression on clients.

To make an impact in the open source community, by fostering innovation and exploring new avenues of web design

Employment History

Art Star Design LLC. Nov 10,2007-March 17,2009. Self-Employed FT.

I am the owner of an Austin-based web design and hosting startup called Art Star Design LLC. I started this company shortly after leaving gainclients inc, to offer a wide range of web design and graphics design services. Art Star Design LLC focused on custom web design solutions tailored for the client's needs, particularly focused on CMS template design for DotNetNuke and Joomla. Former duties included virtually all business functions, ranging from daily operations to financial responsibilities as well as the active design work. No Set Pay, Full-Time.

Skillssets utilized : CSS / HTML / XHTML / DNN / ASP / Flash / Small Business Management

Gainclients Inc. June 19, 2006-Nov 10,2007. FT.

I performed a variety of tasks at GainClients, ranging from light customer service and web site design to team leadership responsibilities. I started under the technical title of UI Developer, then progressed to having two individuals under my direct supervision at 8 months. I currently singlehandedly maintain an existing client base in a support role, and do front-end work for site feature development using the the DotNetNuke platform (mainly skinning and light module development). Salaried, Full-Time.

Skillssets utilized : CSS / HTML / XHTML / DNN / ASP / Flash / Team

Design Examples

- <http://www.lostinthetext.com> : My Personal Portfolio, using a custom wordpress theme
- <http://www.cashfreeclassifieds.com> : An experimental DotNetNuke site (4.5.4)
- <http://www.thesketchbox.com> : A flash-based random face sketch generator
- <http://www.specialdays.org> : Created a custom zen cart theme from scratch to match existing charity's overall aesthetic.
- <http://www.carefreemortgage.com> : Converted existing site from a static layout to a DotNetNuke skin (3.2.2) – GainClients Inc
- <http://www.reddawnaustin.com> : Created a custom wordpress theme for an indie music blog

Recommendations

From Iggy Garcia, Hooligan TV:

“Ryan is very creative, patient and eager to create results for his clients. My projects have always involved video and applications that most web developers can't create or work with, but Ryan figured it out, gave me what I needed and was very enthusiastic to have been part of my breakthrough project. Highly recommend him!” - **Nov, 2009**

From Hollye Day, All Access Today:

“Ryan has been very easy to work with and has been able to meet or exceed our deadlines. He has been extremely flexible with regard to project scope and specification changes.” - **Nov, 2009**
